

FreeBSD Developer

Compensation: Commensurate with experience

Employment type: Project-based/hourly

Immediate Position Available: February 2022

Protectli is a manufacturer of small form factor computers and network appliances. We are looking for FreeBSD kernel developers to assist us in adding and open-sourcing driver support for hardware that we utilize:

- Multi-gig and wifi
- PPPoE enhancements
- Network Performance Tuning

Interested? To apply for this position, please send your resume and any other supporting materials to resume@protectli.com.
